

## **EN 1176:2008 being superseded by EN 1176:2017 – Information statement**

The revised standard BS EN 1176:2017 Playground equipment and surfacing was published by BSI on 30<sup>th</sup> November 2017 as part of a standard's normal five-year review cycle. These revised versions are available for:

- Part 1: *General safety requirements and test methods, plus additional specific safety requirements and test methods*
- Part 2 *Swings*
- Part 3 *Slides*
- Part 4 *Cableways*
- Part 6 *Rocking equipment*

Their 2008 editions, in accordance with CEN regulations, remain available for use and shall be withdrawn by BSI on the 31<sup>st</sup> October 2018. This overlap time period is to give manufacturers time to amend their product lines.

The 2008 additional specific safety requirements and test methods editions remain for Part 5: Carousels; Part 7: Installation, inspection maintenance and operation; and Part 10: Fully enclosed play equipment. Revised editions of these will be issued as their CEN work is completed. Parts 8 & 9 remain as unpublished projects.
